DETAILED ACTION

Drawings

1. The drawings as submitted on November 15, 2000, have been approved by the draftsman.

Claim Objections

2. The numbering of claims is not accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 45 has been renumbered claim 41.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1636

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 36-39 and 41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-5 of U.S. Patent No. 6,291,170.

Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-5 of US 6,291,170 are drawn to a multigene expression profile comprising hybridizing a collection of amplified specific nucleic acid messages to a target where the amplified nucleic acid messages are present in relative concentration to the unamplified nucleic acid messages. Instant claims 36-39 and 41 are drawn to a multigene expression profile comprising hybridizing a collection of amplified specific nucleic acid messages to a substrate where the amplified nucleic acid messages are present in relative concentration to the unamplified nucleic acid messages. While the language of the instant claims differs from the language of claims 1-5 of US 6,291,170, the claims are drawn to the same subject matter.

Allowable Subject Matter

5. Claim 40 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
